# GARDENA – MY GARDEN. MY PASSION.

GARDENA has over 50 years of experience in the development and production of intelligent products and systems for garden care. Today, GARDENA is the leading brand for high-quality garden tools in Europe and is represented in over 80 countries all over the world. Garden owners trust GARDENA and especially value the wide product assortment. There's the right product for every garden area and task – in the traditional GARDENA quality.

Rely on GARDENA as well, because once GARDENA – always GARDENA.

## GARDENA – the full-range supplier

GARDENA offers everything you need for optimal garden care. Whether products for lawn-, tree- and shrub care, tools for soil cultivation, irrigation solutions or pumps – GARDENA's assortment has it all. For a perfect garden.

## GARDENA – with system

The system concept characterises GARDENA's products and is reflected in many product series. You can rely on our systems.

Once GARDENA – always GARDENA.

## GARDENA – in any season

With GARDENA products, you care for your lawn all year round and keep it in excellent shape – regardless of the season.

## GARDENA – your advantages

### 1. Quality

GARDENA products are known for their extremely high quality and reliability. The entire production chain is subject to the strictest inspection cycles and quality guidelines.

### 2. Innovation/Technology

GARDENA develops products that render garden work as easy and efficient as possible. That's why the product portfolio is continuously further developed and optimised – with the latest technology.

### 3. Ergonomics/Comfort

GARDENA places high value on the ergonomics of their products. They should lie comfortably in the hand and make garden work easier.

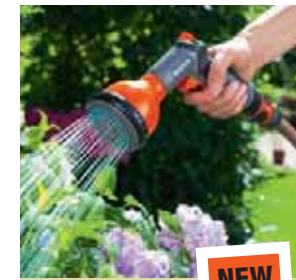

### 4. Service

Should your product require repair or maintenance, the GARDENA Service experts are there for you.

# GARDENA – With system in the home and garden

## Systematic, Innovative Gardening.

The system concept characterises GARDENA's products and is reflected in many product series. The introduction of the Original GARDENA System in 1968 was the milestone here and the basis for the further development of other system products. Once GARDENA – always GARDENA. You can rely on our systems.

Original GARDENA System

NEW

GARDENA Micro-Drip-System

GARDENA combisystem

GARDENA Sprinklersystem

GARDENA Cleansystem

When these GARDENA Systems were introduced many decades ago, they revolutionised the market. Today, they are still the basis of our success. In our continuing efforts to fulfil customers' needs, we have enhanced our tried-and-tested product range and improved the Original GARDENA System.

### 1. Original GARDENA System

The variable system for irrigation: Easy and secure connection from tap to dispensing device, e.g. to a nozzle or a sprinkler. The new Original GARDENA System is distinctive, offering added comfort in handling, attractive design and **frost protection**.

NEW

### 2. GARDENA combisystem

One handle – multi-farious applications: The right product for every garden task.

## GARDENA Battery products

Cordless Design – Since 1973.

GARDENA has revolutionised garden work with battery-powered products. Garden enthusiasts can now enjoy an unlimited radius of action, maximum user comfort and high-level efficiency with the powerful accu designed for a wide range of products. GARDENA has always been a pioneer, developing new and efficient garden classics and assisting garden enthusiasts to enjoy their garden even more.

### Your advantages

- **Flexible**  
Work without troublesome cables
- **Quiet**  
Compared to petrol-driven devices
- **Comfortable**  
Easy to use and replace
- **Practical**  
One battery for several different products
- **Independent**  
No power outlet and extension cable

### Nickel-metal hydride battery technology

Nickel-metal hydride batteries have an especially attractive price-performance ratio and are also environmentally friendly.

### Lithium-ion rechargeable battery technology

Lithium-ion batteries are powerful and high-performance, reliable and without memory effect. They can be recharged at any time.

### Lithium-ion battery technology +

Non-stop working: added power to handle the toughest demands. Powerful, extremely convenient and easy-care. Can be recharged at any time without memory effect.

New products at a glance.

## My Garden. My Passion.

Garden is Passion. And passion for our products and innovations is given great emphasis at GARDENA.

**Frost-proof**

### Original GARDENA System

Why does one invent something completely new when it has proven its worth for the last 46 years? Because, it can be made even better.

The focus of the innovations was the application-oriented Classic Segment of GARDENA Cleaning Nozzles, Watering Sprayers and Spray Lances but also the Original System Parts – GARDENA Tap Connectors, GARDENA Hose Connectors and Water Stops as well as the GARDENA Hose Repairers.

We are the European leader in mobile garden irrigation and our aim is to make the Original GARDENA System even more durable and comfortable in its application, for example, improved ergonomic, weather and frost proof features and up to a 30 per cent increase in hose holding force as well as the colour coding system that lets you know exactly which parts belong together.

More information on pages ..... 78 and 86

### GARDENA Electronic Pressure Pumps

GARDENA – the No. 1\* pump brand in Europe  
Ground-breaking innovations, compact design, intelligent functions and user-friendly, safe products have enabled GARDENA to become the favourite pump brand on the market.

The new, logical range of electronic pressure pumps with application-oriented programmes, even easier operation and high reliability results in greater customer satisfaction.

More on page ..... 112

### GARDENA Turbotrimmers

Easy and convenient, user-friendly and powerful operation – the new turbotrimmer range optimally covers all needs. Whether for trimming grass or cutting back overgrown edges, the GARDENA Turbotrimmer is a convenient tool for efficient gardening.

More on page ..... 22

### GARDENA Cylinder Lawnmowers

In today's ever-shrinking garden, GARDENA Cylinder Lawnmowers ensure a quiet, smooth-running and an environmentally friendly method for optimal cared for lawn. As market leader, GARDENA keeps an eye on current trends and has modernised the classic.

LAWN CARE

# THE 6-POINT PROGRAMME FOR A BEAUTIFUL LAWN.

 **GARDENA®**

# GARDENA Lawn

The lawn is the centrepiece of many gardens. Our long-year experience and expertise in gardens and lawns will help your lawn thrive and grow healthy. For each task there is the right tool. Each product is based on experience, professional solutions, attention to detail and knowledge of what garden lovers need to enjoy their lawn and garden. Everything fits. Everything works precisely. Everything in the highest quality. GARDENA is the right partner from starting a new lawn to the care of larger lawn areas.

## 1. Mow the lawn

The first step for a beautiful lawn is a regular cut. Simply select the right GARDENA model for your demands.

More on page ..... 13

## 4. Aerate and rake

A beautiful lawn needs to breathe. Lawn aerators and rakes provide oxygen deep into the soil and keep your lawn sustainably free of weeds, moss and thatch.

More on page ..... 28

## 2. Trim

Lawn edges remain wherever a lawnmower cannot reach. Using a trimmer in difficult-to-access corners and edges gives the lawn a perfect appearance. Electric or battery-powered Turbo-trimmers quickly and comfortably shorten edges.

More on page ..... 22

## 5. Seed and fertilise

There are times when your lawn needs support: e.g. after extreme weather periods or strong use. Then the GARDENA Spreader helps with seeding and fertilising.

More on page ..... 29

## 3. Cut lawn edges

A lawn looks harmonious when the edges have been adjusted to the lawn height. For this work, GARDENA offers manual and battery-powered Grass Shears.

More on page ..... 26

## 6. Lawn care

Pulling weeds, removing leaves or grass clippings is easy – when the right tools are at hand. GARDENA has the right solution for every task and the right product for every garden task.

More on page ..... 30

# SHORTENING WORKAHOLICS.

## GARDENA Lawn Care

GARDENA quality lawnmowers for every use.

A healthy lawn is a part of any beautiful garden. Mowing is one of the most important tasks for this. Only frequent mowing ensures a lush and thriving lawn. Whether you have a small or large area – GARDENA offers you a wide variety of lawnmowers. You're sure to find the right model that is suitable for your garden.

### GARDENA Robotic Lawnmower

- Mows the lawn all by itself.
- Returns to the charging station on its own.
- A perfectly cared-for lawn at all times thanks to the razor-sharp blades.

### GARDENA Cylinder Lawnmowers

**NEW**

- For highest demands.
- Cutting cylinder and bottom blade do not touch.
- Perfect grass cut, as with shears – golf-course quality.

### GARDENA Rotary Lawnmowers

- For normal cutting-quality demands in home- and allotment gardens.
- Horizontally rotating blade unit captures the grass stalk and cuts it off.
- Larger areas can be mowed in a short time.

## The right mower for every lawn

### GARDENA Robotic Lawnmowers

- Never mow the lawn yourself again.
- Never remove grass cuttings again.

### Robotic Lawnmowers:

R40Li	Up to max. 400 m <sup>2</sup>
R70Li	Up to max. 700 m <sup>2</sup>

### GARDENA Electric Lawnmowers

- Reliable lawn mowing without interruption – always ready to use.
- Low-emission way to mow the lawn.
- Easy to use, light and pleasantly quiet.

### Rotary Lawnmowers:

PowerMax™ 32 E	Up to approx. 300 m <sup>2</sup>
PowerMax™ 34 E	Up to approx. 400 m <sup>2</sup>
PowerMax™ 37 E	Up to approx. 500 m <sup>2</sup>
PowerMax™ 42 E	Up to approx. 800 m <sup>2</sup>

### Electric Cylinder Lawnmower:

380 EC	Up to approx. 500 m <sup>2</sup>
--------	----------------------------------

Can also be used without power as a hand lawnmower.

### GARDENA Accu Rechargeable Cylinder Lawnmower

- Highly flexible lawn mowing – without a cable.
- Low-emission way to mow the lawn.
- Easy to use, light and pleasantly quiet.

### Accu Rechargeable Cylinder Lawnmower:

380 Li	Up to approx. 400 m <sup>2</sup>
--------	----------------------------------

Can also be used without battery technology as a hand lawnmower.

### GARDENA Hand Cylinder Lawnmowers

**NEW**

- Reliable lawn mowing without interruption – always ready to use.
- Ideal for mowing small lawn areas, e.g. the front yard, allotment gardens.
- For a perfectly cared-for lawn.

### Cylinder Lawnmower

400	Up to approx. 200 m <sup>2</sup>
400 C	Up to approx. 250 m <sup>2</sup>

98% of GARDENA Robotic Lawnmower buyers would recommend the product.<sup>(1)</sup>

## GARDENA Robotic Lawnmower

This is lawn mowing today – totally relaxed.

With a GARDENA Robotic Lawnmower, sweat-inducing lawn care becomes relaxation. While you enjoy your free time, the Robotic Lawnmower takes over the bothersome work all on its own. Lawn mowing has never been easier and more convenient.

### Suitable for:

- Lawn areas up to max. 400 m<sup>2</sup> (R40Li) or 700 m<sup>2</sup> (R70Li) with use 7 days a week
- Lawn areas with inclines up to 25 %
- Passages should not be narrower than 150 cm
- Flexible – also suitable for secondary areas

- Never mow the lawn yourself again
- Never remove grass cuttings again
- Always a perfectly tended lawn

### The functioning principle

And the lawn is mowed all on its own.

### Random motion pattern

The result is what matters

The Robotic Lawnmower operates on a proven motion pattern. This has several advantages:

- The entire lawn is mown reliably. For areas up to 400 m<sup>2</sup> (R40Li) or 700 m<sup>2</sup> (R70Li) the Robotic Lawnmower is guaranteed to cut the entire lawn.
- Leaves no stripes and thus produces a beautiful lawn. This motion principle is based on almost 20 years of experience with reliable and high-quality lawnmowers\*.

\* GARDENA is part of the Husqvarna Group, which introduced the first Robotic Lawnmower in 1995

### Easy installation

The boundary wire can be placed either on the lawn surface with staples, or buried below it using a spade. Even if the boundary wire is not buried, it is soon covered with lawn grass and no longer visible.

### Easy and intuitive operation

Thanks to the large keypad and display, the Robotic Lawnmower is easy to programme. Weekdays and times can be flexibly set. Your GARDENA Robotic Lawnmower is only in use when you want it to be.

**GARDENA assists you with planning, installation and initial operation:**

- [www.gardena.com](http://www.gardena.com)
- A detailed installation video is included in the packaging and can be accessed online

## GARDENA Robotic Lawnmower

Well-thought-out technology and convenient features.

### GARDENA Robotic Lawnmower at a glance

**Robotic Lawnmower R40Li**

Sensor	Collision-, tilt- and lift sensor	
Guaranteed SWL (dB)A	58	60
Article No.	4071	4072

#### Easy, intuitive operation

Large selection panel and display. Easy to stop through the accessible stop button. Easy cutting height adjustment from 20 – 50 mm.

#### Finest cutting results

Thanks to razor-sharp blades.

#### Recognises obstacles

Highly sensitive collision sensor.

#### Robust

Works also during rain.

#### Tackles inclines of up to 25 %

Low weight (7.4 kg) and good weight distribution.

#### Theft-protected

Equipped with alarm and PIN code for protection.

#### Environmentally friendly

Low-noise, emission-free and energy-saving.

For lawn areas up to 800 m<sup>2</sup>, also for high and damp grass

## High-performance and always ready to use

### GARDENA Electric Lawnmower PowerMax™.

The GARDENA Electric Lawnmowers are especially well suited for small and large lawn areas, depending on the model, and a size up to 800 m<sup>2</sup>. Thanks to their low weight, they are easy to operate. Mowing is noticeably easier.

## GARDENA PowerMax™ 34 E, 37 E and 42 E

Wider, more powerful and extremely durable – for lawn areas up to 400, 500 or 800 m<sup>2</sup>.

### PowerPlus motorisation

High-performance motor with powerful gear drive and excellent cutting results for low and tall grass.

### Flexible application

Choose between mowing and collecting grass in the grass catcher, or mow and simultaneously mulch.

### Cutting height adjustment

For normal cutting-quality demands in the home- and allotment gardens.

### PowerPlus™ motor

- With high-torque gear drive delivering excellent results under the most difficult conditions

### Ergonomically shaped handle

- For convenient and efficient operation (except 34E)

### Handle height adjustment

- Height-adjustable handle for advanced user comfort
- Can be adjusted to the body height of every user (except 32E/34E)

### Flexible use 3-in-1

- Can be set to mow and catch or mow and mulch (except 34E)

### Manoeuvrable and flexible

- Large rear wheels (except 34E)

### DuraEdge Blade

- Double hardened, precision ground blade for a superior cut

### Edging combs

- For neatly mowing along walls and lawn edges

# GARDENA Cylinder Lawnmowers

For a lawn like a golf course.

With a cylinder lawnmower, blades secured to a rotating cylinder do not touch the fixed bottom blade. This gives a very clean and gentle cut comparable with the cutting results of shears. A perfect lawn like on a golf course is the result.

Especially suited for small lawn areas – up to 500 m<sup>2</sup>

### Your advantages

- A perfect lawn
- Especially suited for small gardens e.g. front yards, allotment gardens
- Available as a hand lawnmower or in battery-powered and electric models

### Exact and clean cut

The high-quality cutting cylinder and bottom blade are robust and longlife.

### Very quiet and easy to push

The cutting cylinder and bottom blade do not touch – that's why the cylinder lawnmower works so quietly.

### Extra-easy to guide

Large wheels with special tread allow a good grip on the lawn.

- Easy cutting height adjustment**

## GARDENA Turbotrimmers

For difficult-to-access lawn areas and lawn edges.

A trimmer is very helpful wherever a lawnmower cannot reach. For example, because the space is too narrow, as between closely-standing shrubs. Also for lawn areas on steep inclines, the trimmer is ideal. Or for high grass in wild, uneven gardens with strong growth and weeds. The trimmer conveniently cuts grass and lawn edges with very little effort using a filament or plastic blade.

### Your advantages

- No bending over while cutting lawn edges
- Mobile and flexible in the garden
- Fast work through easy handling

## GARDENA Turbotrimmers – electric and battery-powered

Flexible – with and without a cable.

GARDENA Turbotrimmer is available as an electric model or as a battery-powered model for cable-free work. For this, GARDENA relies on modern and environmentally friendly technology for long and comfortable use of your trimmer. And best of all: The rechargeable batteries can be flexibly used and are suitable for other GARDENA battery-powered products as well.

# GARDENA Grass Shears

Ready to use at all times.

Grass shears ensure a perfect lawn. An even cutting height is part of a harmonious lawn impression – this includes lawn edges which a lawnmower often cannot reach. With grass shears or, even easier, with accu grass shears, you can shorten grass edges even in narrow areas, e.g. around ponds, beds and patios.

## Comfort Grass Shears, rotatable

For left-handed and right-handed people.

Made in Germany

### Easy handling

- Thanks to the comfortable handle with soft plastic components

### Easy cutting

- Special handle shape with optimal force application and best ergonomics in every situation

### Comfortable work

- For left-handed and right-handed people thanks to 360° rotatable cutting

### Clean cut

- With non-stick-coated, wave-ground cutting blade, special blade bearing for constantly powerful cutting across the entire blade length

## GARDENA Accu Grass Shears ClassicCut

Easy-to-use, light and manoeuvrable.

### Lies well in the hand

- With comfortable handle

### Flexible

- Tool-free switch from grass shears to shrub shears. See page 50

### Easy to use and light

- Cable-free, weighs only 650 grams

### High-performance

- Working time up to 45 min. thanks to easy-care lithium-ion battery

## GARDENA Telescopic Swivel Handle

Work in an upright position while cutting lawn edges. Fast and easy assembly. Infinitely adjustable to body size.

## GARDENA Aerate and rake

Get rid of moss, weeds and thatch.

By aerating, meaning removing moss and weeds from the lawn, the lawn roots receive more space, air and water again. Through raking, the soil surface is loosened. The result is a lush and healthy garden.

### GARDENA Electric Lawn Aerator EVC 1000

#### Saves space

- Handle can be taken apart – saves space for transport and storage

#### Easy work

- High-power motor with high-torque gear drive for excellent results

#### Comfortable operation

- Through ergonomically shaped handle

#### Safe and easy to push

- Thanks to large wheels with special tread

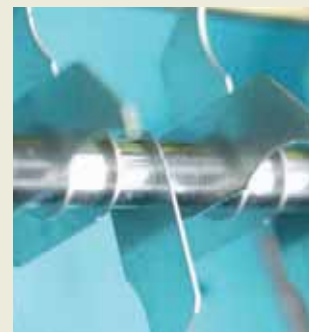

### GARDENA Aerators and Lawn Rakes at a glance

All products and more info at: [www.gardena.com](http://www.gardena.com)

#### Electric Lawn Aerator EVC 1000

Intensive treatment for your lawn. Recommended in spring and/or autumn.

Sharp, offset blades made of specially hardened, galvanised steel penetrate the ground by a few millimetres and remove thatch and dead grass from the soil.

For areas up to:	Approx. 600 m <sup>2</sup>
Weight:	10.6 kg
Output:	1,000 W
With PowerPlus	
Working width:	30 cm
Grass catcher:	optional

Article No. 4068

#### Electric Lawn Rake ES 500

Year-round care, can be carried out after each 2nd or 3rd mowing session.

Low-wear springs made of hardened stainless steel comb the lawn and gently remove moss and thatch. The springs can be easily and individually exchanged.

For areas up to:	Approx. 600 m <sup>2</sup>
Weight:	9.5 kg
Output:	500 W
With PowerPlus	
Working width:	30 cm
Grass catcher:	optional

Article No. 4066

## GARDENA Spreaders

For seeding and fertilising.

Over time, lawns lose important nutrients. Regular fertilising creates a balance. With the GARDENA Spreader, you dosage fertiliser, seed, or winter grit easily and precisely.

### GARDENA Spreaders at a glance

## GARDENA Special Tools

For care of your lawn.

For raking leaves, removing weeds, improving lawn edges or simply for gathering grass cuttings and garden debris: GARDENA products render lawn care easier. The special tools made from top quality materials are easy to use and efficient in application.

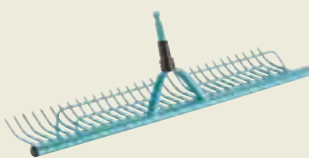

## GARDENA combisystem Lawn Tools at a glance

All products and more info at: [www.gardena.com](http://www.gardena.com)

A gather rake, fan rake or adjustable rake and lawn edge trimmer are also available as connecting tools for the GARDENA combisystem. Simply combine the connecting tool with the right handle. More on the GARDENA combisystem on page 66.

### combisystem Gather Rake

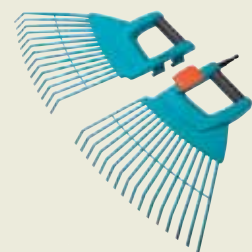

- Frees the lawn from grass cuttings and leaves
- With grass trapping bar

Recommended handle length:  
180 cm

Article No. 3381

### combisystem Plastic Fan Rake XXL vario

- For large-scale and time-saving raking of grass cuttings, leaves etc.
- Can be divided into two parts for comfortable collection of the raked material
- Width 77 cm

Recommended handle length:  
130 or 150 cm

Article No. 3107

### combisystem Adjustable Rake

- For fine and coarse raking material
- With elastic, adjustable spring-steel prongs for raking leaves, grass cuttings, aerated materials etc.
- Variable working width of 30–50 cm

Recommended handle length:  
130 cm

Article No. 3103

### combisystem Lawn Edge Trimmer

- For clean cutting of lawn edges
- With hardened, sharpened steel edge
- Can be used like a spade or pushed along the edge of a lawn

Recommended handle length:  
130 cm

Article No. 3149

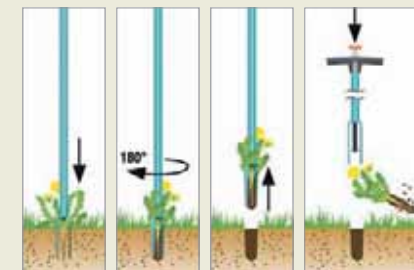

## GARDENA Weeding Trowel

Effortlessly remove weeds – without bending over and without dirtying hands.

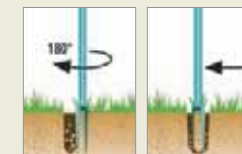

Article No. 3517

### Easy functioning principle

1. Press into soil
2. Turn 180° to the right
3. Pull out – finished
4. Easy removal through the press of a button

**Tip:** close any holes quickly by inserting the trowel next to the hole and drag the soil into the middle. This allows the hole to grow over faster.

**Clean hands**  
The integrated ejector removes pulled-out weeds without dirtying your hands

**Saves the back**  
Work in an upright position. Total length 110 cm

**Easy and efficient**  
Thanks to special blades (filed for patent)

## GARDENA Mobile Garden Cart and The Gripper

Practical helpers for lawn care.

### GARDENA Mobile Garden Cart

- Rolling waste container for flexible use
- For up to 70 kg
- Cover can be used as a dustpan
- With attachment options for GARDENA combisystem handles and connecting tools

Article No. 232

### GARDENA The Gripper

- For gathering waste and refuse
- Long spike with grip- and spiking function for back-sparing work
- Removal of the refuse with the press of a button

Article No. 3567

Trees, hedges, shrubs and flowers

# THE MOST IMPORTANT TASKS AT A GLANCE.

## GARDENA Trees, hedges, shrubs and flowers

Cared-for trees, hedges and shrubs structure and embellish the garden. So that they can attain their full beauty, old and dry branches should be cut and the plants should be continuously shaped and trimmed to the right size. With GARDENA shears and tools for tree- and shrub care, your work will be precise, effective and gentle on your plants, and convenient for you. In GARDENA's wide product assortment, you will find important tools that, with the right care, will help your plants achieve vibrant growth.

### 1. Axes

Accurate chopping with GARDENA Axes to ensure optimum splitting of wood.

More on page ..... 36

### 2. Trimming hedges and trees

To keep hedges in shape, they need a regular cut. Whether for small, large, high or long hedges – GARDENA Hedge Trimmers guarantee the right cut.

More on page ..... 39

### 3. Trim shrubs

Whether you'd like to trim your shrubs or give them a nice shape – with GARDENA you're sure to find the right product.

More on page ..... 48

### 4. Cut flowers

Cut flowers for a bouquet, remove wilted blossoms, trim smaller branches from trees and shrubs, GARDENA Secateurs are versatile in use. For every demand there is the right product.

More on page ..... 52

### 5. Fertilise and care for

Beautiful, healthy plants need tender loving care and, every once in a while, watering, fertiliser or pesticide. GARDENA offers the ideal sprayer for every demand.

More on page ..... 54

## GARDENA Axes

Precise and with optimal splitting power.

People have been using axes for centuries. While axes were used for a wide variety of purposes in the past, today society is returning to their original use. Axes and hatchets are used for wood processing. GARDENA continuously develops garden tools and appliances, and offers an assortment of excellent axes and hatchets that enormously facilitate work with wood while being gentle on the body.

### Features

- Application-suited blade geometry
- Convincing design
- Clear line, slender, powerful shape
- Break-proof head-handle attachment
- Excellent ergonomics
- Premium workmanship and product quality
- Optimal variety – the right tool for everyone
- Ideal transport protection: Special packaging with carrying handle, blade protection and safety lock
- 10 year warranty

### Excellent work ergonomics

GARDENA Axes pack a punch. This is due to the optimal weight distribution, the light glass-fibre reinforced plastic and the ergonomically shaped handle that optimally adjusts to the hand. Through the light plastic, the axe has a low total weight. The powerful impact energy is concentrated with maximum effect in the heavy axe head – where it is needed. The glass-fibre reinforced plastic absorbs the impact energy, reduces vibrations and is gentle on the wrists. The “crowbar” at the end of the handle prevents slipping.

### Insert-moulded axe head

The break-proof head-handle attachment offers high working safety

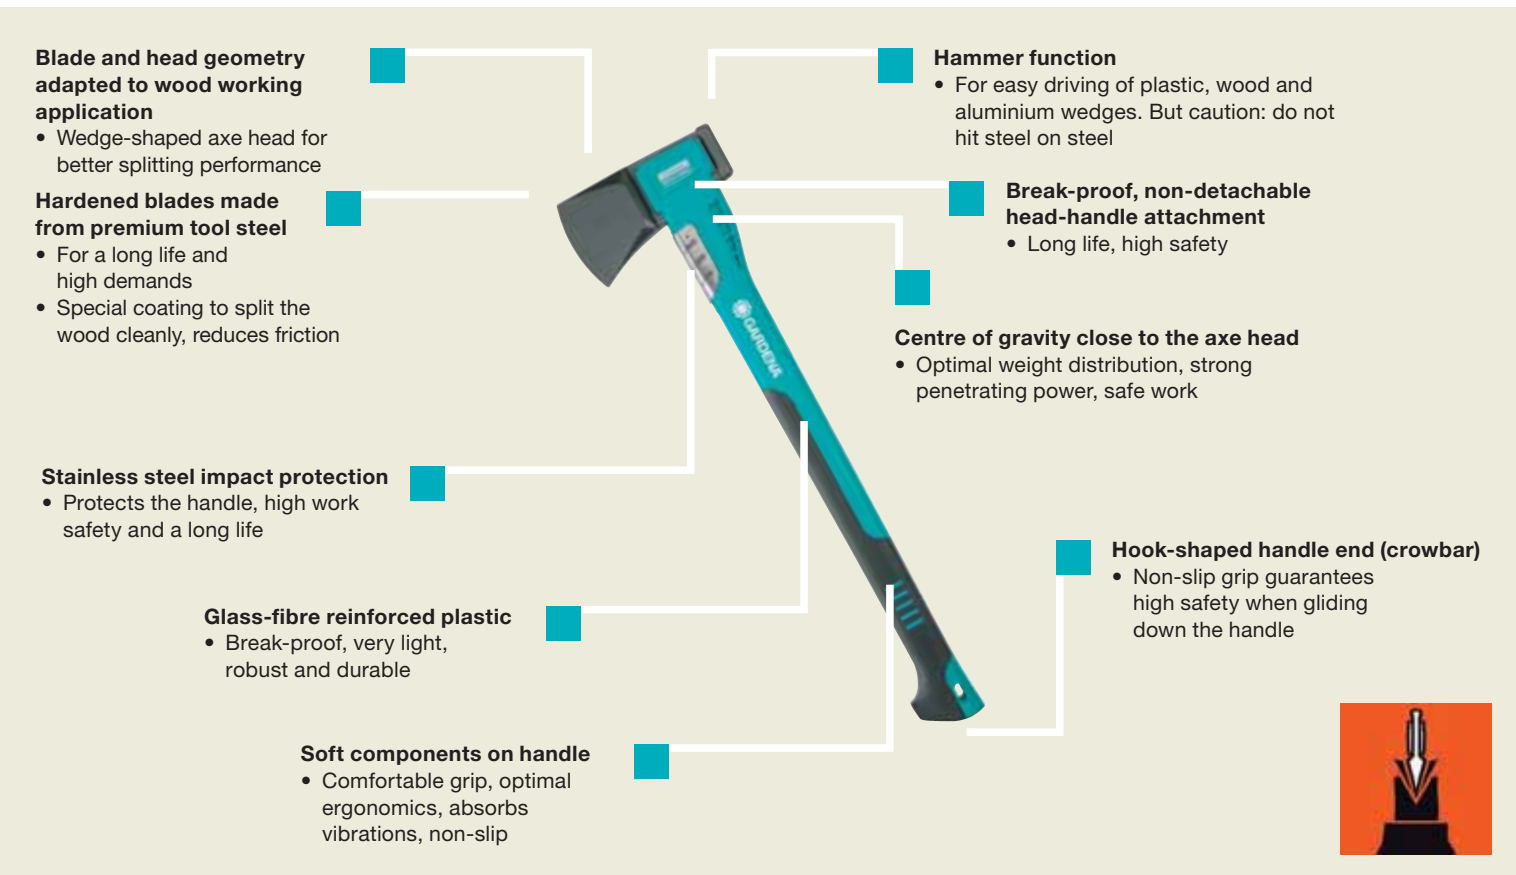

### GARDENA Tip

When felling trees, always cut in diagonally to the fibre direction and from above downward in order to lift out a wedge from the wood. This wedge can be cut out to two-thirds from the trunk, depending on the incline and desired falling direction. Then another wedge is cut out from the back, set slightly above, until the tree falls.

## The Splitting Axe

For Cutting Enthusiasts.

### Application-adapted blades and axe head geometry

The blades and head geometry of the GARDENA Axes and Hatchets are adapted to the application and work situation, and thus guarantee optimum working results. GARDENA Splitting Axes, with their cutting angle and wedge-shaped axe head are particularly suitable for splitting fire wood.

### Work safety

Axes most frequently break beneath the head, where strong forces take effect. Precisely these spots are often hit on edges and weakened. The GARDENA Axe has stainless steel impact protection that protects spots with strong wear.

As special packaging with a carrying handle, blade protection and safety lock, the transport protection offers additional safety when transporting as well.

### Hammer function

GARDENA Axes have a specially worked striking surface on the back of the axe head. This can be used to easily drive in wedges.

### Safety note

Please only drive in steel wedges with hardwood or plastic hammers. Hammering steel on steel is dangerous and can lead to splinters.

## GARDENA Branch Pruners

Made in Germany

Overhead Cutting – Safely from the Ground.

With the clever tree- and shrub loppers from GARDENA, you can reach even thicker branches from the ground. Comfortably and without dangerous ladder climbing. You'll easily reach even more remote spots and achieve excellent cutting results. Innovative problem solutions and the most modern materials ensure extra comfort. Select the perfect pruning tool for your garden!

## GARDENA Pruning Loppers

For a precise cut.

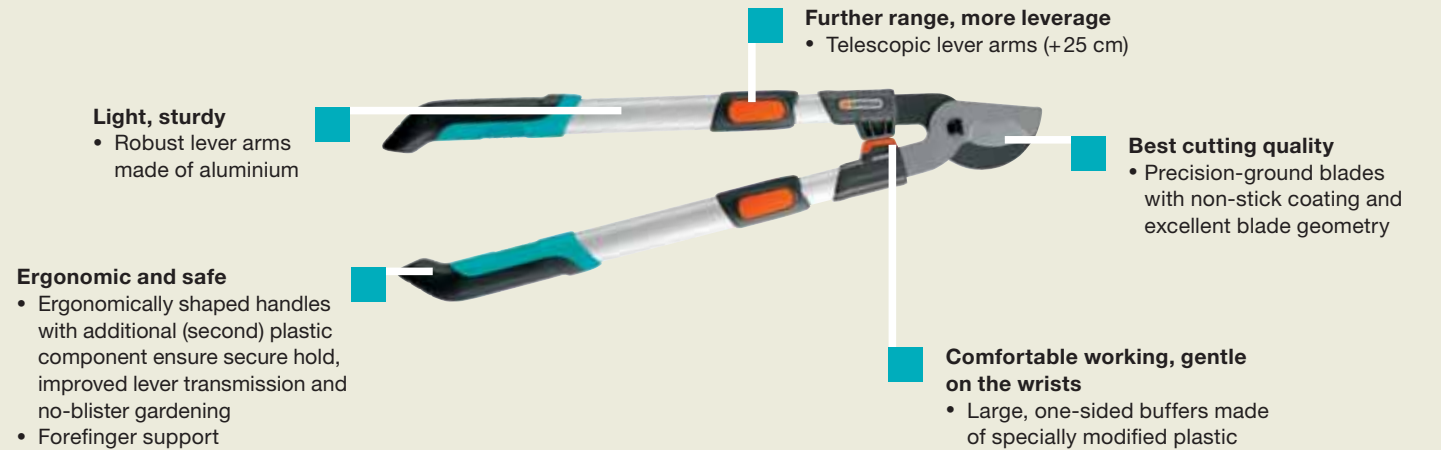

Regular pruning revitalises trees and makes them more healthy, beautiful and harmonious in your garden. By thinning out trees, air and light reach the undergrowth and the growth shape is refined. Pruning will not cause trees to shoot into the sky, but it does render care measures easier and promote a richer fruit harvest. Trees are also better able to withstand storms. With GARDENA Pruning Loppers, you effortlessly cut through thick and thin.

## GARDENA Comfort Pruning Loppers

Convenient, effortless cutting.

# GARDENA Saws

The powerful saw assortment.

Smaller branch diameters of up to 45 mm can also be cut with pruning loppers. GARDENA has a wide variety of suitable tools for this. Starting with 45 mm diameters, a saw is needed. It is specially designed for thicker branches and logs. Perfect your tree care by choosing the right saw.

## The right saw for every task

### Bow Saw

For bigger jobs and thicker branches and logs, the long, robust and high-performance Bow Saw is ideal.

### Gardeners' Folding Saw

The especially easy-to-use saw for all sawing work in the garden. Safety lock for 3 possible settings.

### Gardeners' Saw

Gardeners' saw guarantees smooth cutting with triple grinding. The particularly smooth pulling cut is ideal for fresh and dry wood (trim saw).

## GARDENA combisystem

Cut, saw, pick fruit.

With the GARDENA combisystem, you can even reach tree crowns without a ladder. The telescopic handles and corresponding connecting tools can be flexibly exchanged. Simply connect the telescopic handle to the gardeners' saw, the bow saw or the fruit picker using the fastening screw and work in heights of up to five metres.

## Gardeners' Folding Saw 200P

Power for thick branches

### Hard-chrome-plated saw blade

- For non-corrosive, continuous use

### Precision cutting

- Impulse-hardened tooth tips with triple grinding on each saw tooth

Made in Germany

### Thumb hole

- For easy opening and closing of saw blade

### Lockable saw blade

- For 3 different sawing angles depending on use

### Integrated hanger

- For tidy and convenient storage of the saw

### Stopper

- Non-slip when pulling

### Extra soft components

- Anti-slip working

## GARDENA Hedge Trimmers – electric or battery-powered

Flexible – with and without a cable.

GARDENA Hedge Trimmers are available in electric or battery-powered models for cable-free work. GARDENA relies on modern and environmentally friendly battery technology for long and convenient use of your hedge trimmer. And best of all: The batteries can be flexibly used, also for other GARDENA battery-powered products.

## GARDENA Hedge Trimmers

Cut – tend – shape.

The ideal hedge trimmer is an important tool when hedges and shrubs need care and structure. Regular trimming is vital if hedges are to be healthy and dense. And if you'd like to shape your hedges, there are no limits to your imagination: Regardless whether you prefer a box- or trapezoid shape, or want to freely design: With the GARDENA Hedge Trimmers you always make the right choice – regardless for which task.

From GARDENA: The right hedge trimmer for every garden

### EasyCut

For comfortable hedge trimming. Easy and light with ergonomic handle.

### HighCut

**Tiltable head:** can be angled to cut hedgetops and groundcover.

**HighCut:** Features a 90° rotatable blade unit for ensuring an ideal cutting angle.

### THS Li-18/42

**Tiltable head:** can be angled to cut hedgetops and groundcover.

**Telescopic:** The telescopic hedge trimmer is suitable for a reach of up to 3 metres. You can cut high hedges safely from the ground – without a ladder.

### Lithium-ion rechargeable battery technology

Lithium-ion rechargeable batteries are powerful and high-performance, reliable and without memory effect. They can be recharged at any time.

### Nickel-metal hydride battery technology

Nickel-metal hydride batteries have an especially attractive price-performance ratio and are also environmentally friendly.

# GARDENA Accu Shrub Shears

Cut – tend – creatively shape smaller hedges and shrubs.

GARDENA Accu Shrub Shears are light, flexible and powerful. With their low weight, they are the perfect tool for trimming, shaping and pruning smaller hedges and ornamental trees and shrubs. Especially for filigree shaping of spirals, spheres and cones for boxwood, accu shrub shears are indispensable.

### ClassicCut

Versatile in use thanks to innovative blade change: for cutting grass, boxwood and shrubs. Comfortable to use and cable-free.

### ComfortCut

Tilttable handle for enhanced ergonomics. Thanks to 18 cm long blade suitable for cutting smaller bushes and shrubs.

### Flexibel

Quick switch from shrub shears to grass shears and vice versa.

## GARDENA Accu Shrub Shears ComfortCut

An easy and wireless option for a smooth cut.

### Nicely shaped

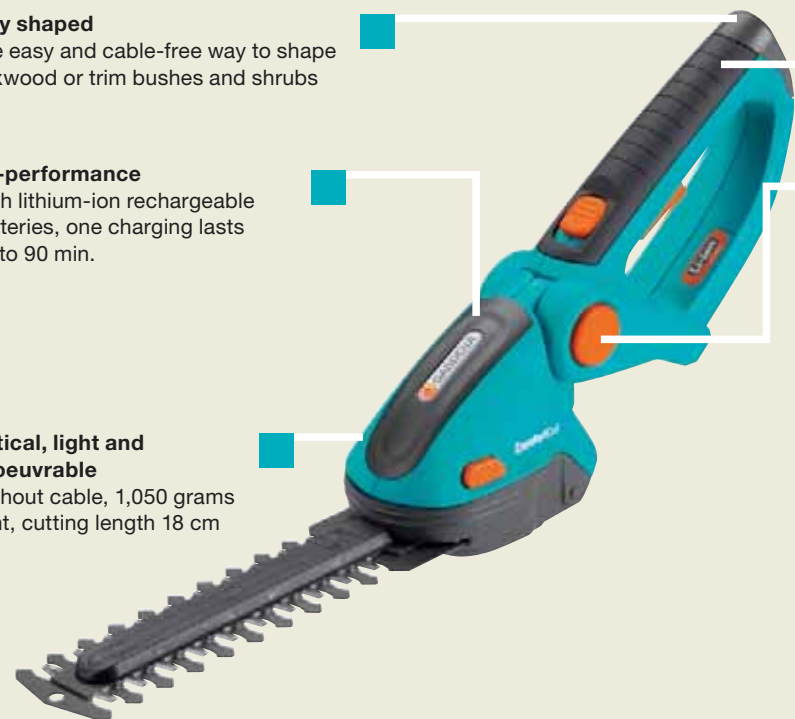

- The easy and cable-free way to shape boxwood or trim bushes and shrubs

### High-performance

- With lithium-ion rechargeable batteries, one charging lasts up to 90 min.

### Practical, light and manoeuvrable

- Without cable, 1,050 grams light, cutting length 18 cm

### Lies well in the hand

- Handle with soft plastic components, a secure and closed grip

### Convenient

- Handle can be angled, optimal adjustment to the natural holding position

### GARDENA Teleskop Swivel Handle

For cutting lawn edges and floor cover plants in an upright position and more range for high hedges and side contours. Fast and easy assembly. Infinitely adjustable to body size.

# GARDENA Hedge Clippers

Cut precisely.

Hedges and shrubs set accents in the garden. By choosing to shape or trim, the garden lover determines what size and shape hedges and shrubs are to have. With hedge clippers, you can precisely trim smaller hedges or single, large plants, or give an electrically trimmed hedge that final touch. A perfect hedge cut is a matter of the right tool.

### Short- and straight-ground blades

For precise shaping.

### Long, wave-ground blades or with special cutting edges

For large areas.

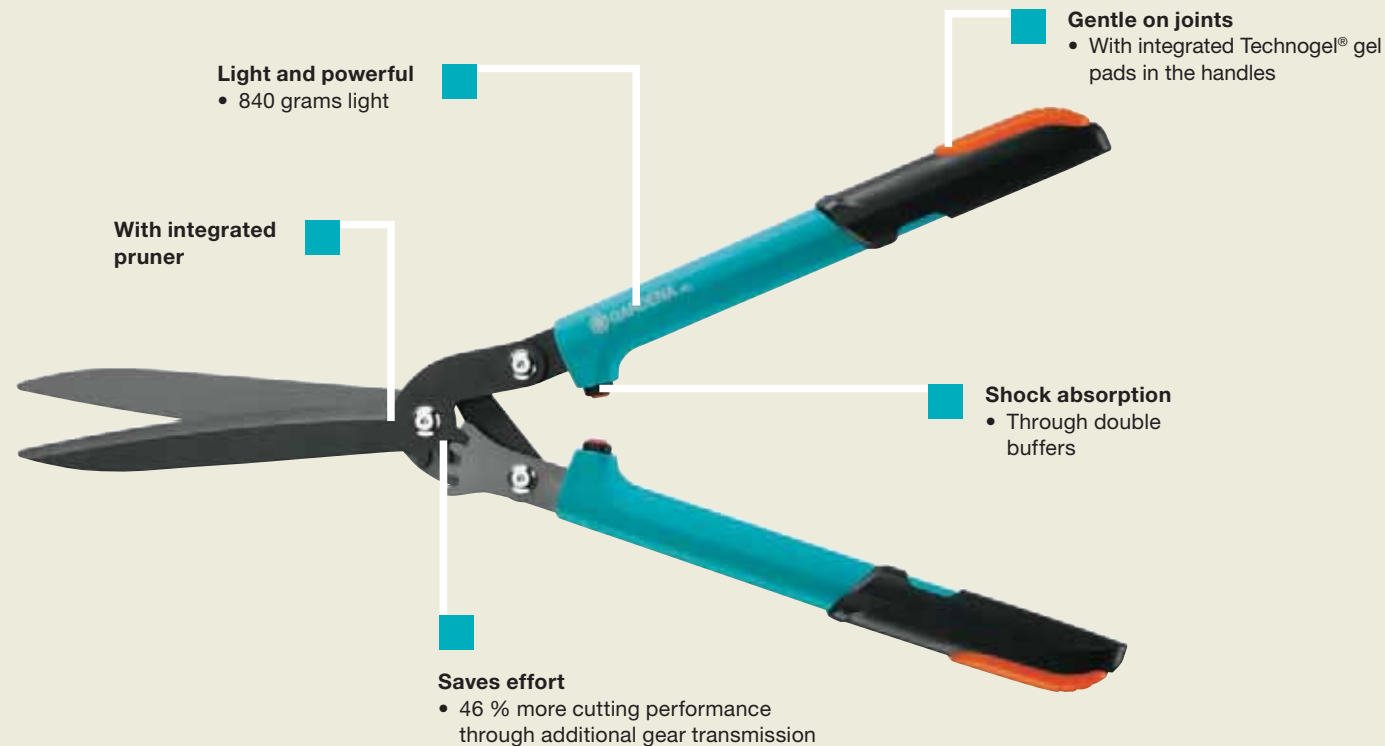

### Gear transmission

Easy and tire-free cutting of thick branches.

## GARDENA Comfort Gear Hedge Clippers 600

## GARDENA Comfort Secateurs

Made in Germany

Powerful and comfortable – for easy cutting of branches and twigs.

Also available as an anvil model.

### Clean and precise cut

- Four-fold precision-ground blades made of double-hardened steel and with non-stick-coated upper blade

### Lies well in the hand

- Comfort handle with soft plastic components (non-slip top material)

### Fits in any hand

- Handle opening can be infinitely adjusted to hand size and use

## GARDENA Secateurs

Good secateurs – full of power – healthy garden.

Powerful secateurs are a real joy. Regular pruning makes hedges, shrubs and flowers fit. Remove wilted blooms, clip twigs that are in the way, cut back roses, bring plants into shape, thin out shrubs, prune fruit trees or finish fine cutting work: For every task, GARDENA has the right secateurs. With GARDENA Secateurs, you cut through thick and thin.

### GARDENA Secateurs for every requirement

#### Bypass

The secateurs with two cutting positions are ideal for young, green plants, flowers, and green wood.

#### Anvil

The sturdy anvil is suitable for hard, dry wood, cuts branches for pruning and thereby prevents damage to bark.

#### Ratchet Secateurs

These cut smaller branches and twigs as usual in one go. For branches with a diameter of up to 22 mm, the ratchet function can be enabled. This gives you up to 150 % greater cutting power.

# GARDENA Sprayers

Plant care with fine-mist irrigation, fertiliser or pesticides.

So that plants may grow healthily and robustly, they not only need good soil and sufficient water but also nutrients that the soil does not always contain. Pressure sprayers are useful helpers for fine irrigation or for distributing fertiliser or pesticides. For every demand, there is the right model.

# GARDENA Pressure Sprayers

Fine and infinitely adjustable spraying.

GARDENA Pressure Sprayers can be universally used to spray various liquids and offer maximum comfort both in handling and transporting.

## GARDENA Pump Sprayers

For smaller water quantities GARDENA Pump Sprayers are ideal for flowers in the home, on the patio or in the garden, where small water quantities are required. All GARDENA Pump Sprayers lie perfectly in the hand and have a volume capacity of 0.5 or 1 litre.

## GARDENA Pressure Sprayers

For larger water quantities GARDENA Pressure Sprayers have a volume capacity of between 1.25 and 12 litres and can be comfortably used for trees, shrubs, fruit gardens or large flower fields. Thanks to the wide filling opening, the pressure sprayers can be easily filled.

## GARDENA Pump Sprayers – The versatile sprayers for garden and household.

The well-shaped and robust pump sprayers are useful and indispensable helpers. For plant care, for dampening clothing, for cleaning windows and other multifarious uses in the garden and household. The filter at the suction pipe is especially practical and protects against nozzle obstruction.

## GARDENA Comfort Pressure Sprayer

Makes plant care fun.

### Flexible

- With long hose for reaching higher plants

### Safe

- Thanks to safety valve

### Convenient

- Thanks to padded shoulder straps

### Extra-large filling opening

- Makes filling and mixing of liquids easier

### Stable

- The extra-wide moulded feet allow easy pumping

The high-quality GARDENA Comfort Pressure Sprayer is ideal for plant protection, fertiliser and targeted irrigation of seedlings, for example. The spray nozzle can be fully adjusted from hard jet to fine mist.

Beds and soil

# CULTIVATING THE SOIL RIGHT – STEP-BY-STEP.

## GARDENA Beds and soil

Soil is the basis of life for all plants. Good soil cultivation is an important requirement for a beautiful garden with lush flowers beds and crisp fruit and vegetables. With GARDENA, the possibilities grow. Your garden thrives and, with the right products, all is tidy around your home. With GARDENA you cultivate the soil: Spades and other tools are the perfect soil cultivation products. With various heads for connection, GARDENA combisystem offers everything you need for around the home, for cleaning garden pathways, or for removing leaves, snow and ice. Especially clever and practical: Different GARDENA combisystem handles can be combined with various tools. This gives you the right combination of handle and head tool for every garden task.

### 1. Dig and remove

To set a bed, the soil must first be dug up and/or loosened. The ergonomic and comfortable soil cultivation tools in various models are suitable for this.

More on page ..... 60

### 4. Clear and remove weeds

When weeds, leaves, moss or grass cuttings collect in beds, plants become more susceptible to disease and pests. Tidy up lawns and beds easily and efficiently with the right products by GARDENA.

More on page ..... 66

### 2. Loosen and aerate

So that garden soil is and remains porous and rich in nutrients, it should be occasionally loosened and aerated. For this, GARDENA offers a wide selection of products.

More on page ..... 64

### 5. Clean

On the patio, on the driveway or on pathways around the home – leaves, moss, grass or debris are a nuisance. GARDENA has the ideal products for this area as well.

More on page ..... 67

### 3. Plant

Regardless whether you plant flower bulbs directly in the soil or ridge up earth for vegetables – with GARDENA you will always find the right application tool.

More on page ..... 66

### 6. Work in winter

With GARDENA Snow Shovels and Ice Scrapers, you free your pathways and driveway of snow and ice. The GARDENA Spreader distributes salt comfortably and evenly.

**GARDENA TIP**  
Rule of thumb: For work involving pushing and pulling, it is better to use a longer handle. For chopping work, a shorter handle is better suited.

**GARDENA combisystem Handles – Versatile in use.**

**GARDENA combisystem**

One handle – various connecting tools – multifarious applications.

Garden work requires the most various tools – for cultivating soil in vegetable and flower beds, to cleaning garden pathways or patios, to removal of leaves on the lawn or clearing of snow in winter.

**Your advantages**

- **Flexible**  
All connecting tools fit each GARDENA Handle
- **Safe work**  
The large fastening screw guarantees a pull- and twist-proof handle-tool connection

**GARDENA combisystem Connecting Tools – Easy change.**

The GARDENA combisystem offers everything you need for garden work. And best of all: You only need one combisystem handle made of wood, aluminium or a handle for back-sparing work, and you can combine the connecting tools easily and randomly. Using the fastening screw.

Connect the selected tool to any handle and quickly change again when necessary.

Tighten the fastening screw. Finished!

## GARDENA combisystem Connecting Tools

Good tools for excellent soil cultivation.

The first aim of soil cultivation is to keep the soil loose. Another important task is the removal of weeds. The fewer weeds grow, the more nutrients will reach the plant. In addition to this, there are also GARDENA Garden Tools for raking and sweeping, for cleaning, and for multifarious planting- and transplanting tasks.

## GARDENA combisystem Cleaning Tools

The effective helpers for work in and around the home.

Leaves, moss, dirt etc. frequently collect in the garden and around the house. Regular cleaning is necessary to keep everything in top shape. Whether cleaning joints, scrubbing, sweeping or working in heights – with the GARDENA combisystem Connecting Tools, you'll tackle jobs around the home easily and efficiently.

### Loosen and aerate

Recommended handle:  
combisystem-Teleskopstiele

Article No. 3650

#### combisystem Angle Broom

For removal of cobwebs etc. Individual adjustment of the work angle through infinitely adjustable head angle.

Recommended handle:  
combisystem-Teleskopstiele

Article No. 3633

# THOROUGH SNOW CLEARING.

## GARDENA combisystem Winter Tools

Big help with ice and snow.

GARDENA combisystem Tools can be used not only in spring, summer and autumn – but also in winter, helpful tools facilitate work. Clearing snow, removing ice spots and trodden snow, spreading salt, sand or grit are all much easier.

### GARDENA combisystem Snow Shovel ES

Clean snow clearing on smooth surfaces.

**No slipping of snow**  
• Due to high sides

**Snow does not stick**  
• Thanks to extremely fine surface structure

**Sturdy**  
• Through wide edge

**Cold-resistant plastic blade (up to -40°C)**  
• And salt-resistant

**Slides well**  
• Through wide ribs

### GARDENA Snow Scoop

For comfortable clearing of snow in larger areas.

**Pleasant work**  
• Handle with plastic sleeve

**Convenient removal of snow**  
• Additional holding positions

**Very sturdy**  
• Additional aluminium tube

**Adjustable to body height**  
• Telescopic adjustment in 3 steps (approx. 30 cm)

**Easy breaking into large snow piles**  
• Profiled foot-rest

**Easy assembly**  
• Insert and turn frame to fasten

**Longlife and robust**  
• Galvanised steel edge

Article No. 3260

#### combisystem Snow Shovel KST

- Flexible and wear-resistant plastic edge
- Low-noise snow clearing on uneven surfaces, such as natural stone, pavement or tiles
- Fits perfectly with the combisystem Ergoline Aluminium Handle

Available in a width of 40 or 50 cm  
Recommended handle length: 130 cm

Article No. 3240 / 3241

#### combisystem Snow Shovel ES

- Rust-free and extra-resilient stainless steel leading edge
- Clean snow clearing on smooth surfaces, such as concrete and pavement
- Fits perfectly with the combisystem Ergoline Aluminium Handle

Available in a width of 40 or 50 cm  
Recommended handle length: 130 cm

Article No. 3242 / 3243

#### combisystem Ice Scraper

For removal of ice spots and trodden snow thanks to sharp-edged spring-steel blade. For year-round use – also suitable for removing dirt.

Available in a width of 15 or 30 cm

Irrigation

**AND YOUR GARDEN WILL  
GREEN AND BLOSSOM.**

# GARDENA Irrigation

The garden is a place of relaxation and well-being. Here, you can leave your cares behind or enjoy the green with friends or family. To ensure that all plants and lawn areas remain green and healthy, even during longer dry periods and high temperatures, the right irrigation is vital. Regardless whether you water by hand or would like to partially or fully automatise watering: With GARDENA Irrigation, you choose minimum effort with maximum convenience. For each area of your garden, GARDENA has the right products – for the lawn, for trees, hedges, shrubs and flowers, and also for beds and the soil.

## 1. Transport water

When there's no rain, plants need to receive water by other means. With the Original GARDENA System, you take water directly from the tap and transport it, e.g. with a hose, to where it's needed.

More on page ..... 78

## 4. Irrigate with system

Watering your garden with a GARDENA Irrigation System relieves you of the task. The Sprinklersystem conveniently irrigates the lawn and the Micro-Drip-System is ideal for hedges, beds and greenhouses.

More on page ..... 92

## 2. Distribute water

GARDENA has the right products for targeted irrigation of plants. Simply connect a nozzle or sprayer to the hose and water plants in pots or beds. For lawns e.g. the mobile sprinklers are well suited.

More on page ..... 86

## 5. Control water

With the GARDENA Irrigation Control Systems, you water your garden completely automatically. Simply set when you would like your garden to be watered and enjoy your free time.

More on page ..... 99

## 3. Clean with water

The running Original GARDENA Cleansystem is the strong range for all cleaning tasks in the home and garden. Thanks to various handles and connecting devices, the system is versatile in use.

More on page ..... 88

## 6. Pump water

Easily use water from cisterns, rain water tanks or wells for irrigating your garden – with the Pumps by GARDENA. There are also models suitable for draining and supplying water for domestic use.

More on page ..... 100

## Original GARDENA System – The New Generation of a Million Times over Proven Classic

NEW and frost-proof\*

For over 45 years, the Original GARDENA System has stood for easy watering in the garden. One click – and the connection from the water tap to the hose and the watering accessory is absolutely tight.

The new generation of the Original GARDENA System offers an even better hold with the connection between hose and connectors and in many functions, an improved handling.

\*Classic range only

## Perceived Quality Made Visible

Modern design, premium materials, clear product classification.

### The new Original GARDENA System 2015 – even more attractive and convenient

The new and for GARDENA typical modern design makes the system even more attractive and convenient in use.

### Even more grip

The particularly ergonomically shaped system parts with soft components lie ideally in the hand and ensure a good grip even with wet hands.

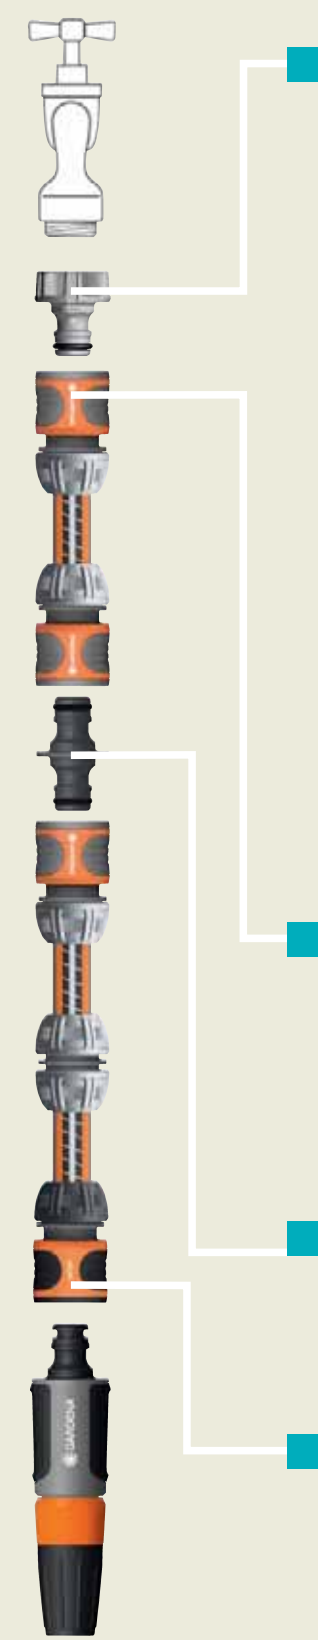

### Even tighter connection

The new system parts hold not only the GARDENA Hoses particularly tight thanks to the specially shaped and filed for patent sleeve nut.

### Even higher quality

Premium materials and precise workmanship ensure excellent quality of the Original GARDENA System.

### Connection options for the tap

New colour scheme to easily locate parts:

- Light hose lead – connection to the water tap
- Dark hose end – dark water stop + accessories

#### (1) Tap Connector

For connection to the tap. Easy, problem-free handling without tools.

Article No. 18201

#### (2) Angled Tap Connector

Prevents kinking and twisting of the hose on the tap due to rotating and swivelling connector.

Article No. 998

#### (3) Four Channel Water Distributor

For connection to the tap. For the operation of up 4 watering accessories. Adjustable and lockable water flow.

Article No. 8194

#### (4) Twin-Tap Connector

For connection to the tap. For the operation of up 2 watering accessories. Adjustable and lockable water flow.

Article No. 8193

#### (5) Adapter for Indoor Taps

For connecting the GARDENA System to an indoor tap (e.g. kitchen and bath).

Article No. 8187

#### Hose lead

#### Hose Connector

A simple pull quickly releases the connection to the hose.

Article No. 18215

#### Hose connections

#### Coupling

To extend the hose. Also for transferring from 19 mm (3/4") to 13 mm (1/2") hoses.

Article No. 931

#### Hose end

#### Water Stop

Disconnect = automatic water stop. Connect = water flow. Without a walk to the tap.

Article No. 18213

## GARDENA Hoses

### With Power Grip for optimum grip

Garden hoses have to withstand heavy-duty use for many years. They are used, uncoiled and coiled, dragged back and forth and moved across small, large, regularly or irregularly shaped gardens. The requirements on garden hoses differ. GARDENA offers the right hose for every garden owner and every need. All hoses are free from phthalates and heavy metals, and are UV resistant. The Power Grip Profile guarantees the perfect connection between hose and hose connector. Thanks to new technology, these interlock like toothed wheels. The typical GARDENA design ensures cohesion between all elements – both from a technological and a visual point of view – and acts as a seal of quality.

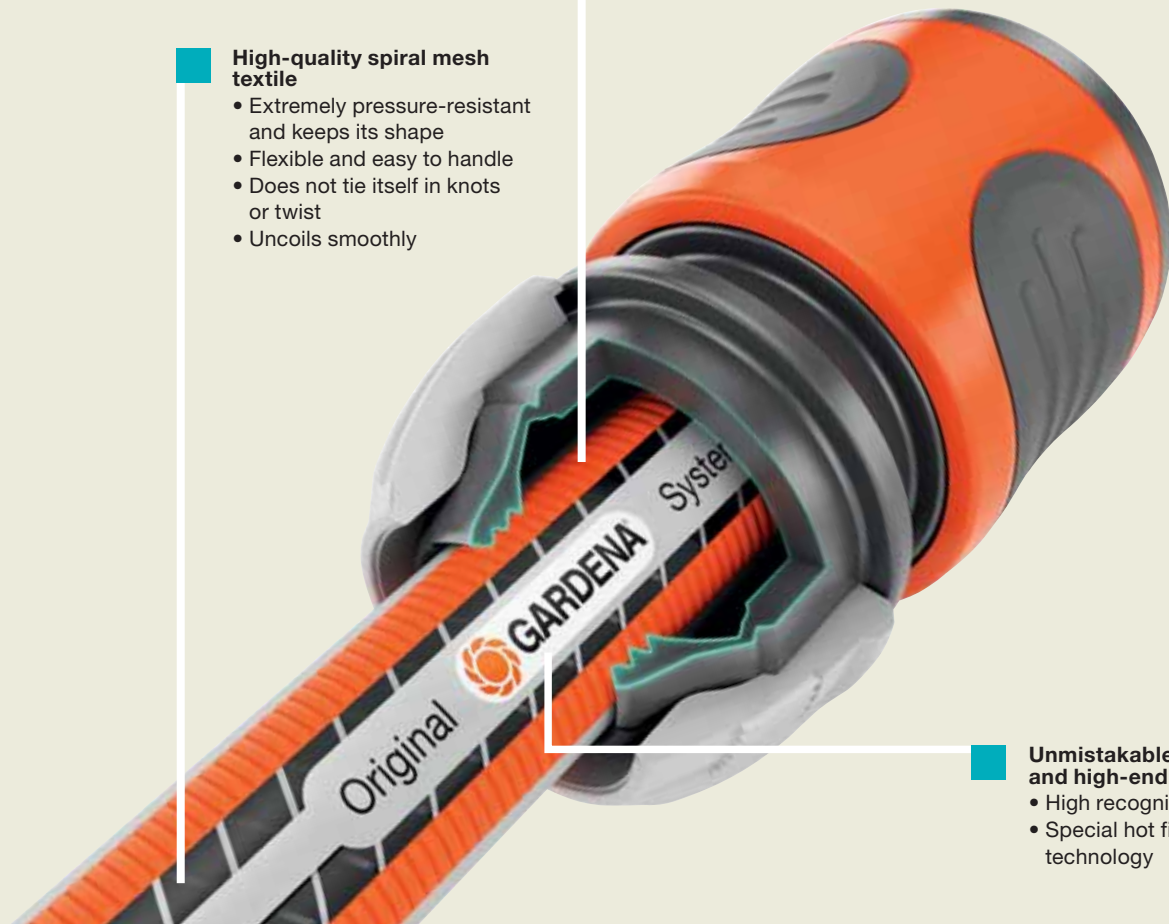

### POWER GRIP

#### Power Grip Profile

- Perfect connection of hose and Original GARDENA System Parts
- Optimum grip

#### High-quality spiral mesh textile

- Extremely pressure-resistant and keeps its shape
- Flexible and easy to handle
- Does not tie itself in knots or twist
- Uncoils smoothly

#### Unmistakable design and high-end branding

- High recognition value
- Special hot film printing technology

# NO MORE HOSE HAZARDS.

## GARDENA Wall-Mounted Hose Boxes

Now even more convenient: the solution for easy garden irrigation.

Simply convenient and tidy – no bending over, cranking, dirty hands

- Pull out the hose
- Water
- Let the hose roll up automatically

### GARDENA Wall-Mounted Hose Box 25 roll-up automatic

**Convenient and safe:**  
Automatic hose roll-up with spring mechanism.

#### Spring mechanism with lock

- Smooth unrolling of the hose. Hose can be locked in position every 50 cm.
- Reliable and safe hose roll-up – a simple, quick pull at the hose releases the lock and the hose is wound up.

### GARDENA Wall-Mounted Hose Box 35 roll-up automatic Li

**Unique and convenient:**  
Automatic hose roll-up with battery drive.

#### Unique – motor-powered technology with lithium-ion battery

- Effortless unrolling of the hose without resistance – stop the hose at any position.
- Reliable hose roll-up – a press of a button conveniently and safely rolls up the hose in the box with an ideal roll-up speed of approx. 1.5 m/sec.

## GARDENA Wall-Mounted Hose Box 35 roll-up automatic Li

Simple, convenient, safe and tidy – automatic hose roll-up thanks to battery technology.

### Long operating time and rechargeable at any time

- Powerful lithium-ion battery, approx. 50 roll-up cycles per charge

### Easily readable

- LED display indicates battery charge level or fault

### Effortless unrolling of the hose

- No spring force to overcome

### Safe in sun and rain

- Protected electronics and integrated ventilation

### Space-saving

- Wall bracket, can be swivelled by 180°

### High-quality

- High-quality hose with 13 mm (½") hose for high water flow for example when sprinkling

### Equipment

- 35 m high-quality hose 13 mm (½")
- 2 m connection hose 13 mm (½")
- Original GARDENA System Fittings and Nozzle (Art.-No. 900, 901, 902, 915, 913, 8114)
- Screws and wall plugs for mounting the wall bracket
- Battery charger

# Automatic garden – with GARDENA

And you can leave your garden on its own.

Irrigating your garden can be so easy when you leave it up to a GARDENA Irrigation System. Once installed, your plants are conveniently supplied with the necessary water quantity while you relax. Irrigate during the day, at night, during your holiday – you conveniently set the time and duration with a GARDENA Watering Control. Lawns, flowers, vegetables and potted plants thrive even better thanks to ideal irrigation, and you have more time to enjoy your garden.

## 1 GARDENA Sprinklersystem

The convenient pop-up irrigation of your garden. Thanks to permanently installed pop-up sprinklers, your lawn will be irrigated where it is needed. Automatic drain valves protect against frost.

More on page ..... 92

## 2 GARDENA Micro-Drip-System

Irrigation with drip heads. Evaporation is very low and the water is efficiently supplied. For flower- and vegetable beds, hedges or shrub rows, in green-houses or for potted plants on patios.

More on page ..... 94

## 3 GARDENA Pipeline

Water – like electricity from the mains. The GARDENA Pipeline is installed below ground and with a hose you withdraw water where you need it.

More on page ..... 96

## 4 GARDENA Watering Controls

With the GARDENA Watering Controls, you determine when and for how long your garden is to be irrigated. Fully automatic – it couldn't be more convenient.

More on page ..... 97

## GARDENA Pumps

Gardena Pumps are the ideal addition to your irrigation system. Simply use water from cisterns, rain water tanks or wells for irrigating your garden.

More on page ..... 100

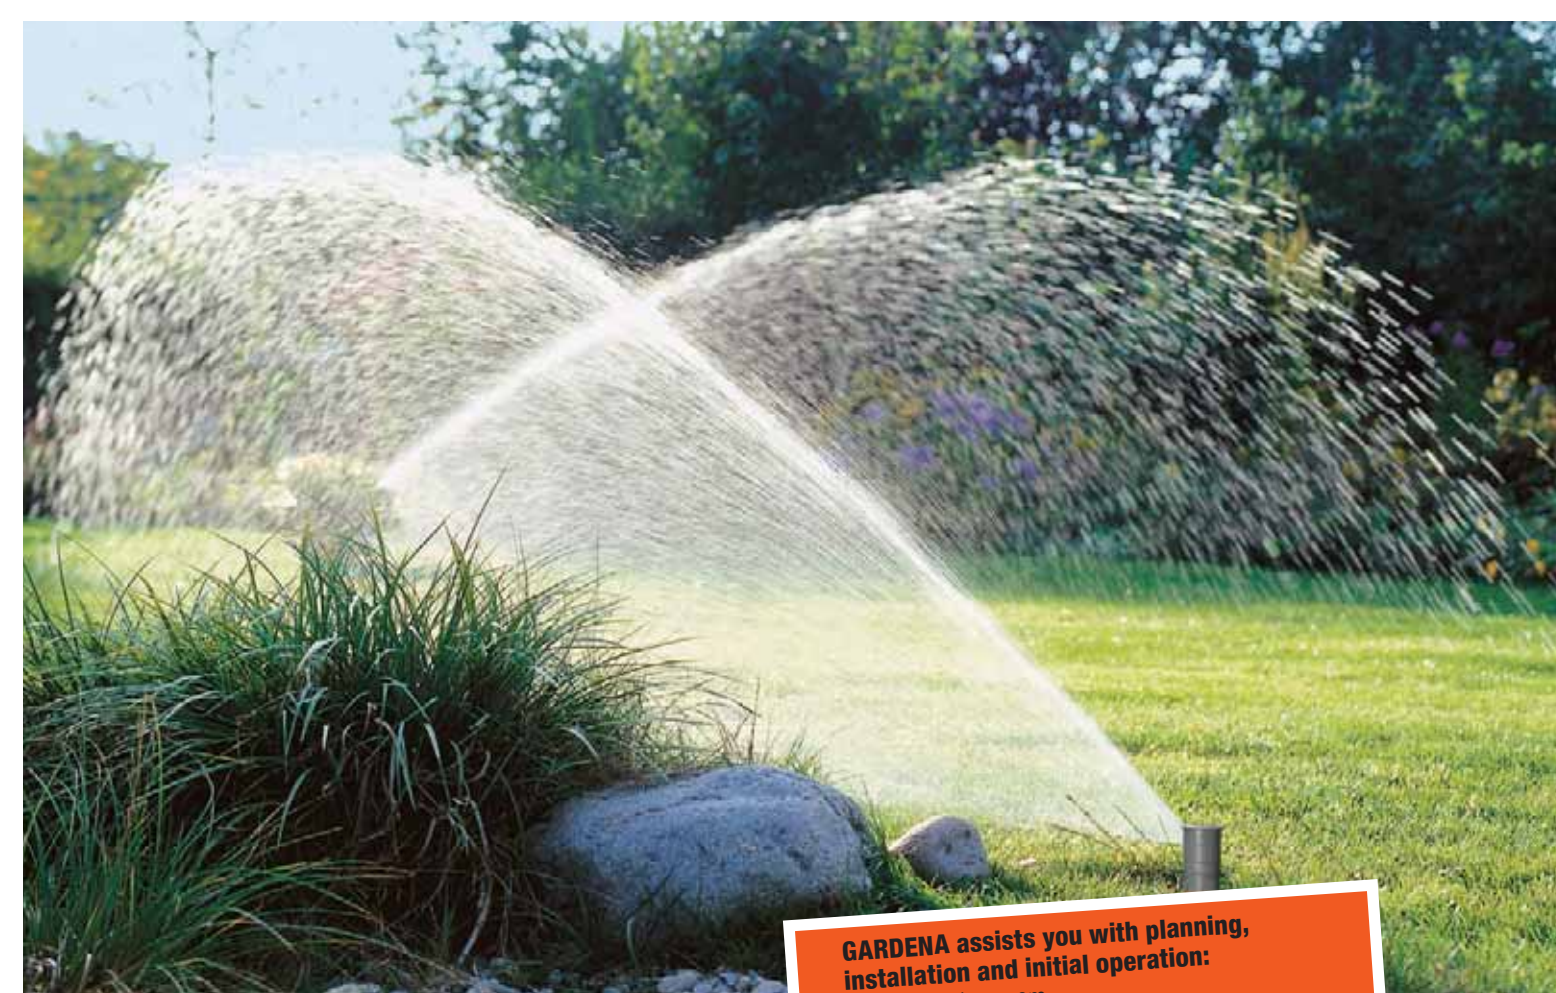

## GARDENA Robotic Lawnmower Never mow the lawn yourself again

It could not be easier: The garden is automatically irrigated and the lawn is mowed all on its own, while you relax.

More on page ..... 14

**GARDENA assists you with planning, installation and initial operation:**

- [www.gardena.com](http://www.gardena.com)
- Brochure "Watering Systems"

## GARDENA Sprinklersystem

Convenient pop-up lawn irrigation.

With a permanently installed, below-ground GARDENA Sprinklersystem, you'll irrigate your garden conveniently. Depending on the lawn shape, there are various pop-up sprinklers that distribute the water where it is needed. Once their work is finished, they disappear back into the ground. The result is a lushly green, healthy lawn. You can also install your GARDENA Sprinklersystem in your garden. Totally flexible and easy, the traces of installation also disappear after a short time. Thanks to automatic drain valves, the GARDENA Sprinklersystem is frost-proof and a GARDENA Watering Control automatically starts and stops lawn irrigation. Stop watering – and enjoy your garden!

### Selected GARDENA Sprinklersystem products at a glance

Convenient lawn irrigation through a permanent, below-ground installation gives you more free time and garden enjoyment.

All products and more info at: [www.gardena.com](http://www.gardena.com)

#### Circular Sprinklers 2 3

Circular Sprinklers are suitable for watering most small areas as they can be easily combined with other sprinklers.

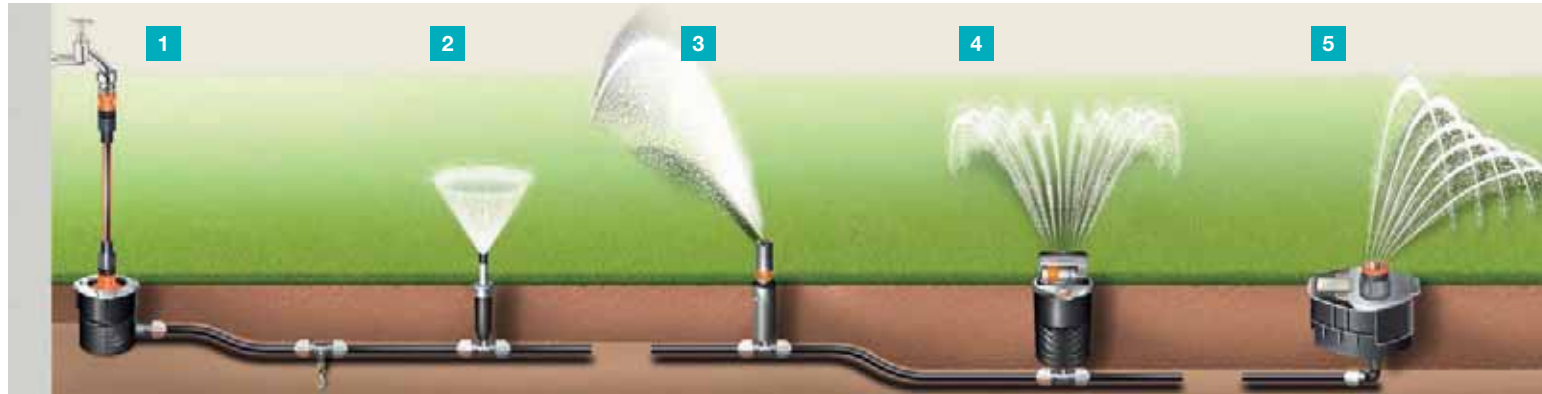

#### Pop-up Oscillating Sprinklers 4

For watering square and rectangular areas.

#### Large-Area Pop-up Sprinklers 5

Suitable for watering individual lawn shapes.

#### Connecting point

For the underground supply of water to the GARDENA Sprinklersystem.

Article No. 2722

#### Pop-up Sprinkler S80 (S-Sprinkler)

Recommended for areas up to 150 m<sup>2</sup>. The S 80/300 model is also available for watering over the top of taller plants. Sprinkling range can be adjusted from 2.5 – 5 m.\*\* Infinitely variable sector setting between 5 – 360°.

Article No. 1569

#### Turbo-driven Pop-up Sprinkler (T-Sprinkler)

Recommended for areas up to 150 m<sup>2</sup>. Various models. Sprinkling range of 4 – 11 m depending on model.\*\* Infinitely variable sector setting between 25° and 360° depending on the model. With memory function.

Article No. 8203

#### OS 140

For areas up to 140 m<sup>2</sup>\*\*. Adjustable spray width, range and water flow. Swivelling sprinkler head. Turbo-driven pop-up sprinklers and oscillating pop-up sprinklers can be used together in one irrigation line because they distribute a similar amount of water – for easy system planning and installation.

Article No. 8220

#### AquaContour automatic

For areas up to 350 m<sup>2</sup>\*\*. Up to 50 key contour points can be stored. With memory function.

Article No. 1559

#### Complete Set with Large-Area Pop-up Irrigation AquaContour automatic

Complete and ready to connect up for easy and convenient pop-up irrigation of individual lawn areas. Flexible area coverage thanks to variably adjustable ranges.

Up to approx. 350 m<sup>2</sup> lawn area.  
Article No. 2708

#### Complete Set with Pop-Up Oscillating Sprinkler OS 140

Complete and ready to connect up set for convenient irrigation of rectangular lawn areas. Add-on and extendable system.

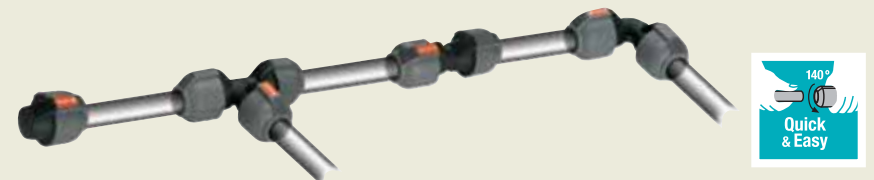

For lawn areas up to 140 m<sup>2</sup>.  
Article No. 8221

#### GARDENA Simple Connection Technology

Install the Sprinklersystem quickly and easily

With the patented "Quick & Easy" Simple Connection Technology, installing a GARDENA Sprinklersystem isn't difficult at all. And thanks to the many installation elements, you can flexibly modify the system according to your garden.

- Pipe assembly / disassembly through simple turning by 140°
- Impact-resistant, weather- and UV-proof

#### Frost protection

Winter frost? No problem! The automatic drain valves protect the system against frost.

\*\* The calculated coverage is dependent on the operating pressure (bar)! The data for the AquaContour were obtained with 4 bar, for all other pop-up sprinklers with 2 bar operating pressure at the sprinkler.

**GARDENA assists you with planning, installation and initial operation:**

- [www.gardena.com](http://www.gardena.com)
- Brochure "Watering Systems"

## GARDENA Micro-Drip-System

Targeted and water-saving plant irrigation.

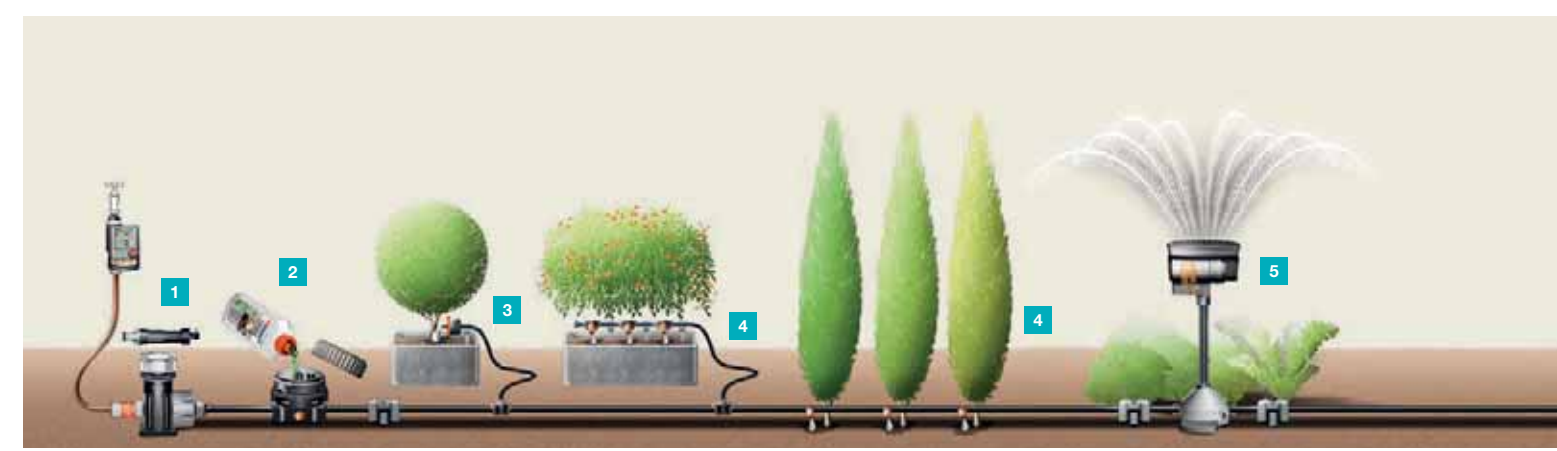

With a GARDENA Micro-Drip-System, you irrigate all plants outside of the lawn in a targeted and water-saving way. Ornamental- or vegetable plants, outdoor crops, tender shoots in the greenhouse, and balcony or patio plants are supplied with water through constant drops, a light trickling or a gentle mist spray. The soil is gently and evenly moistened without too much water evaporating, leaking or flowing away. The GARDENA Micro-Drip-System is flexible and easy to install thanks to the "Quick & Easy" – Simple Connection Technology. And used with a GARDENA Water Computer, everything is fully automatic – it couldn't be more convenient.

### Selected GARDENA Micro-Drip-System products at a glance

For targeted and water-saving irrigation of plants with varying water requirements.

Article No. 1399

### GARDENA Simple Connection Technology

Install the Micro-Drip-System quickly and conveniently

With the patented "Quick & Easy" Simple Connection Technology, installing a GARDENA Micro-Drip-System isn't difficult at all. And thanks to the many installation elements, you can flexibly modify the system according to your garden and requirements.

- Easy connection, detachment and modifying
- Frost-proof (only the master unit needs to be removed)

# GARDENA Water Computers

Automatic garden irrigation – 30 years of perfect programming.

As early as 1985 GARDENA revolutionized garden irrigation with the world's first water computer. With constant innovations for first time gardeners and demanding garden owners, GARDENA continuously enhances the models. For example a model which makes irrigation easier is available for controlling a mobile sprinkler, a permanently installed Micro-Drip-System or your sprinkler system. A rain sensor or soil moisture sensor can be connected to all GARDENA Water Computers – for irrigation only if it is necessary.

## GARDENA Pipeline

Water like electricity from the mains.

Simply click your hose onto a water connector or water plug and you'll have water quickly wherever you need it. Whether in the flower bed, for a GARDENA Sprayer, for water-saving irrigation with the GARDENA Micro-Drip-System or for cleaning with the GARDENA Cleansystem. The GARDENA Pipeline is permanently installed underground and frost-proof thanks to automatic drain valves. You can say goodbye to long hoses in your garden.

### GARDENA Pipeline products at a glance

Find out more about GARDENA Multi-Channel Controls in the "Watering Systems" brochure or on the Internet at [www.gardena.com](http://www.gardena.com)

## GARDENA Multi-channel Controls

For automatic irrigation of larger systems.

GARDENA Multi-channel Controls are particularly well suited when the water quantity of the tap is insufficient for operating the entire irrigation system at once, or when water requirements per garden area vary. Valves are integrated in the irrigation system that automatically open or close the water flow. The signal for this is provided by the GARDENA Multi-channel Control. GARDENA offers two different systems that allow automatic irrigation for your entire garden.

## GARDENA Accessories

For addition to Multi-channel Controls and Water Computers.

Thanks to the soil moisture sensor or rain sensor, the control recognises sufficient soil moisture or rain and then automatically stops irrigation. And with the water distributor automatic in combination with the Water Computer MasterControl, up to six garden areas can be irrigated one after the other.

### With power connection:

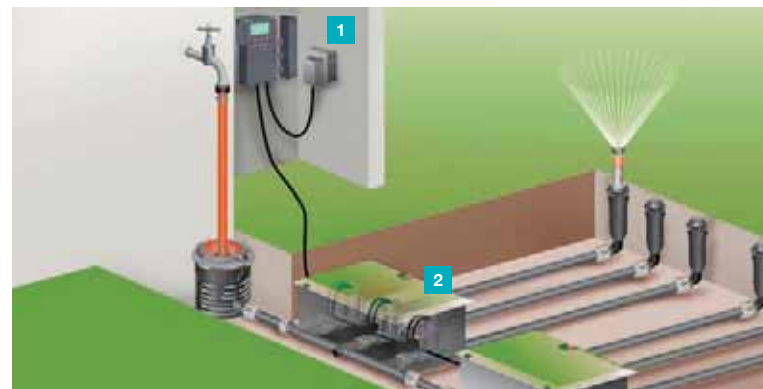

Through the **irrigation control system 1** mounted on a wall, the **valves 2** directly receive the impulse via the cable for when to open or close the water flow. Up to 12 irrigation valves (garden area) can be fully automatically controlled.

**1** Comfort Irrigation Control System 4040 modular

Article No. 1276

**2** Irrigation Valve 24 V

IRRIGATION

## Always the right pump.

Types of pumps at a glance.

GARDENA offers you and your customers an extensive range of pumps. With powerful, easy-to-use and reliable pumps for three different types of applications: garden irrigation, water supply and draining. From the basic Classic Pump to the high-quality Premium Pump in stainless steel design – you will find the right pump for every need. The overview below shows which pumps are available for which tasks.

**GARDENA will help you select the right pump and advise you comprehensively:**  
 Online pump advisor at:  
 • [www.gardena.com](http://www.gardena.com)

### Draining

#### Areas of use

- Pump water from the pool, pond or full excavation pit
- Pump water out of flooded cellars
- Pump water out of the laundry room
- Transfer water e.g. from a pond to a rain water tank

#### Requirements

- Powerful drainage performance
- Fast pumping out or transfer of water
- High delivery capacities

#### Your advantages

- Pump lots of water in a short time
- Prevent the worst water damages through automatic and fast pumping
- High functional safety

#### Product selection

- **Submersible Pumps**  
For dirt particles of up to 5 mm diameter
- **Dirty Water Pumps**  
For dirt particles of up to 38 mm diameter

### Irrigation

#### Areas of use

- Irrigate with water from wells, cisterns and rain water tanks
- Increase water pressure of the tap

#### Requirements

- Pump with continuously high pressure for even irrigation
- Powerful, water pumping that is reliable on long term

#### Your advantages

- The right pump for every situation
- High-pressure and even garden irrigation
- Convenient and safe handling
- Spare resources – save drinking water

#### Product selection

- **Garden Pumps**
- **Electronic Pressure Pumps**
- **Petrol-driven Motor Pumps**
- **Rain Water Tank Pumps**
- **Submersible Pressure Pumps**
- **Deep Well Pumps**

### Supplying Water for Domestic Use

#### Areas of use

- Water for the home (e.g. toilet flushing and washing machine) and for the garden from alternative water sources

#### Requirements

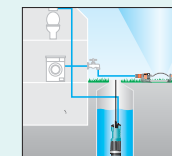

- Fully-automatic operating pump
- High safety and reliable use

#### Your advantages

- The home and garden are automatically and reliably supplied from alternative water reservoirs (e.g. cisterns, wells etc.)
- Spare resources: conveniently pump water, save drinking water, spare the environment

#### Product selection

- **Electronic Pressure Pumps**  
For stationary and mobile use
- **Pressure Tank Units**  
For stationary use – permanently installed in the home
- **Automatic Submersible Pressure Pumps**  
For stationary use (e.g. installed in cisterns)

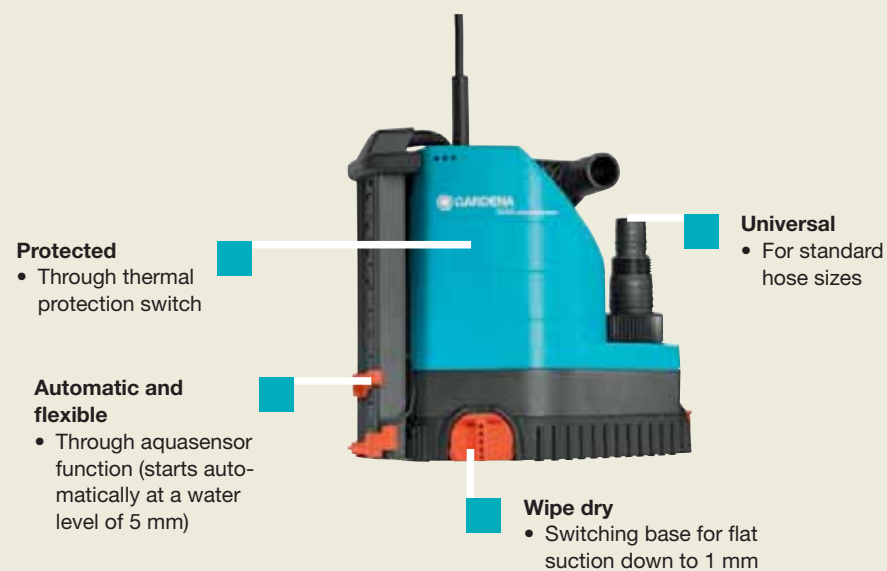

# GARDENA Submersible Pumps / Dirty Water Pumps

For versatile use for pumping and transferring.

When clear or lightly dirty water needs to be pumped or transferred, GARDENA Submersible Pumps ensure easy draining. Also for other draining tasks and for flooded cellars, GARDENA Submersible Pumps are powerful and immediately ready to use. For draining an excavation pit or a pond, the GARDENA Dirty Water Pumps are ideal helpers. The powerful and robust GARDENA Dirty Water Pumps tackle particles of up to a diameter of 38 mm.

## GARDENA Comfort Submersible Pump 9000 aquasensor

For tidy conditions.

### aquasensor

The pump starts automatically as of a water level of 5 mm. The cut-in and cut-out level are independently adjustable (5 mm to 220 mm). With flat suction of down to 1 mm (wipe dry).

### Float Switch

For automatic cut-in and cut-out. Infinitely variable via panel of cable holder. Plug-in device for permanent manual operation (except Article 1777 and 1790).

## GARDENA Comfort Dirty Water Pump 8500 aquasensor

Clearing water from cellars and excavation pits.

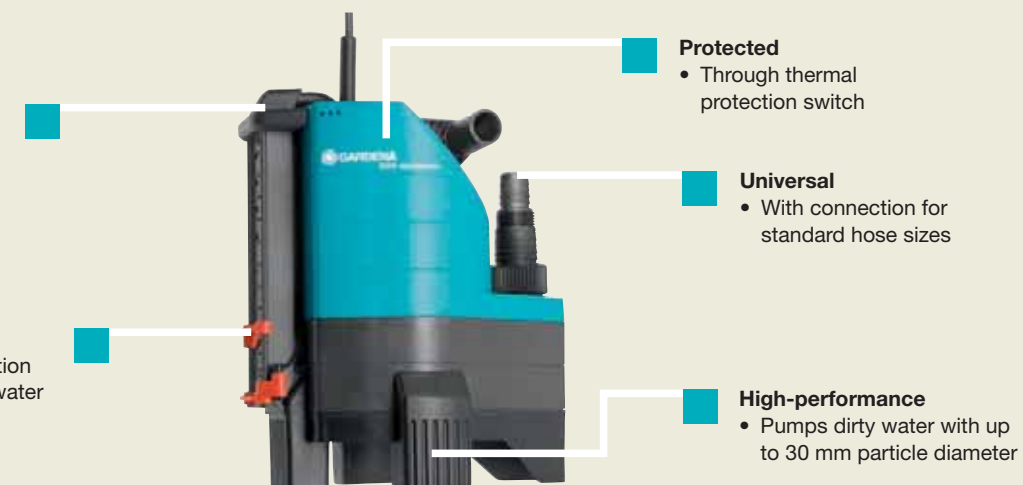

Suitable accessories: GARDENA Ribbed Hoses, flexible and keep their shape, in 19 mm (¾") – 38 mm (1 ½") version

### Robust

- Thanks to the sturdy housing, low-wear pump impeller and quiet, maintenance-free capacitor motor

### Automatic and flexible

- Through aquasensor function (automatically starts at a water level of 65 mm)

# GARDENA Garden Pumps

Versatile in use – eco-friendly and economical.

With the powerful GARDENA Garden Pumps, you can transport rain water from the cistern, rain water tank or well, and irrigate your lawn, flowers or vegetable garden while sparing the environment. From the starter model to the high-performance pump, with GARDENA you'll find the right pump for your requirements based on garden size, length of hose, number of sprinklers or desired pressure.

### Robust and reliable

High-quality materials and meticulous design protect the pumps against damage and ensure a long life and secure operation.

### Safe-pump function

- LED status display with warning function (fault)
- Automatic safety switch-off
- Integrated dry-running safety

### Low-noise pump operation

Rubber feet guarantee a sturdy stand and low-noise and low-vibration operation.

## GARDENA Comfort Garden Pump 5000/5

Powerful with excellent safety properties.

### Practical

- With large filling opening for easy filling without a funnel

### Comfortable

- Thanks to the ergonomic handle

### Effective

- As two connecting devices can be operated at the same time (2 outlets, one swivable)

### Safe

- Through safe-pump function, safety switch-off and dry-running safety

### Sturdy and quiet

- Thanks to rubber feet that give a sturdy stand and noise-dampening operation

### Longlife

- Through ceramic protection and double sealing system

### Robust

- Thanks to fine-mesh filter that protects against impurities or damage

### Problem-free

- Easy drainage before frost sets in

# GARDENA Rain Water Tank Pumps

The powerful ones for cost-saving garden irrigation.

With GARDENA Rain Water Tank Pumps, you can fill watering cans or irrigate your garden with a connected sprinkler, a nozzle, a sprayer or the Micro-Drip-System. No more troublesome lugging of watering cans. Practical: The pump can also be used for draining.

## GARDENA Classic Rain Water Tank Pump 4000/2 automatic

Water on Tap.

### Practical

- Integrated carrying handle, cable- and telescopic pipe mounting

### Requirement-suited

- Through adjustable regulating- and shut-off valve

### Individual

- Adjustable to rain water tank size through infinitely telescopic fitting pipe

### Saves energy and is convenient

- Automatically switches on when water is required and then switches off again

### Safe

- With dry-running safety

### Problem-free

- Through integrated filter and additional foot

## GARDENA Classic Submersible Pressure Pump 5500/3

Pump water from below ground.

### Robust and reliable

- Thanks to top-quality materials

### User-friendly

- Handle and supplied fastening rope

### Flexible use

- Thanks to the integrated 33.3 mm (G1) mating thread suitable for the Original GARDENA System

### Quickly ready to use

- Through back-flow preventer

### Protected

- Through thermal protection switch

### Safe

- Through dry-running safety

### Longlife

- With rust-free stainless-steel filter

### Low-noise

- Thanks to multi-stage feed impeller

### Practical use

- Water pumping from great depths with a pump diameter of only 15 cm

## GARDENA Submersible Pressure Pumps automatic

Water supply with automatic cut-in/cut-out.

The GARDENA Submersible Pressure Pumps automatic pump from depths up to approx. 20 m from wells or cisterns. The innovative automatic function is especially convenient. Thanks to the electric manometric switch and flow recognition sensor, the pump automatically switches on for water retrieval and then off again afterwards. With a power cable up to 22 m in length, the pumps are installed and, with the supplied fastening rope, can be quickly drawn up when required. Can also be used for supplying water for domestic use.

# GARDENA Electronic Pressure Pumps / Pressure Tank Units

For fully automatic distribution of water in the home and garden.

The GARDENA Electronic Pressure Pumps deliver constant, flowing water like from the tap. You pump water reliably e.g. from wells and cisterns. The compact design allows flexible and space-saving use. The GARDENA Pressure Tank Units make use of alternative water sources for automatic use of non-potable water in the home, e.g. for the toilet and washing machine. This reduces costs and spares the environment.

## GARDENA Premium Electronic Pressure Pump 6000/6E LCD inox

Innovative and powerful – the top model with comfort features.

**NEW**

- Programme for small quantities**
  - Trouble-free operation with low delivery capacity
  - Water Drip Safety
- Large filler tube**
- Integrated fine-mesh filter**
  - Easy to use
  - Safer operation
- New check valve technology**
  - Optimal suction process
- Impeller: 5 stages**
  - Very quiet operation
- Drain screw**
  - Simple frost protection
- Pump housing made of stainless steel**
  - High-quality material
- Foldable, ergonomic carrying handle**
  - Space-saving
  - Easy transportation
- 2 outputs, one with swivel**
  - Several connection options
- Large LC Display**
  - All functions under control
  - Easy troubleshooting
- Thermal overload protection**
  - Protects the motor from overheating
- Rubber feet**
  - Less vibration, low-noise operation

## GARDENA Service

Always on the safe side.

Detailed information on our products can be found on our website [www.gardena.com](http://www.gardena.com). You'll also find comprehensive planning assistance for irrigation control systems, pumps or ponds that render your product selection easier.

Should you have more questions on our products, accessories or spare parts, our qualified GARDENA Service will be pleased to help you.

And for the rare case that your GARDENA product should need a repair or maintenance, we've thought ahead and can offer you an extensive range of services. Our technical support service will be glad to assist you with questions or problems. If you are unable to repair the product yourself, our central repair service will take it over. For this purpose, we also have a pick-up service and product exchange service.

With GARDENA you're always on the safe side.

You can reach our GARDENA Service as follows:
